Dear VAST Member,

Thank you for joining, or renewing your membership to the Virginia Association of Science Teachers. This response acknowledges receipt of your paperwork and is accompanied by your membership card for the Virginia Association of Science Teachers. Membership cards indicate your current dues status (current year, multi-year, life or Corporate).

Please take the time to visit the VAST web page, you will find many links and features you may find useful. While there, take a look at VAST's latest issue of *The Journal of Virginia Science Education*, an on-line peer-reviewed publication. It is an excellent source of thought provoking articles for your professional growth.

One of the benefits of your membership is receiving four copies of another VAST publication, *The Science Educator*, delivered directly to you. Look in your four issues throughout the year for the latest developments on this year's professional development institute as well as articles, labs, and lessons submitted by your peers across the Commonwealth. Both of these VAST publications need your support. Please consider writing and submitting a piece for either *The Journal of Virginia Science Education*, or *The Science Educator*.

To get the most out of your membership in VAST, you need to avail yourself of every opportunity to become involved in the organization. IF you would like to become more than just a member, and become an *actively involved* member of VAST, we have a place for you to participate. Please do not hesitate to send an email and let me know your interest.

Please also consider presenting at the VAST Professional Development Institute in Hampton this November. This fantastic event is made possible by professionals like you sharing their ideas, strategies, and lessons. Help VAST make the 2010 PDI the best ever by attending and presenting.

I look forward to serving you in 2010 and I hope to hear from you and see you in Hampton in November.

Sincerely,
Juanita Jo Matkins
President 2010
